

PIVOT POWER Flight Deck USB Charger

PIVOT POWER Flight Deck Portable EFB Charger is a reliable device for providing power to charge iPads during flight. Two USB ports deliver power suitable for your iPad(s) while providing surge suppression protection.

Use the following tips to realize years of service with overload and short circuit current limit protection to safeguard both the connected device and the aircraft's 28VDC supply bus.

Best Practices

- Use only in approved 12-36VDC power receptacle
- Ensure charger USB ports are clear of dust/dirt/contamination
- Plug charger into 12-36VDC power receptacle *before* connecting USB cable
- Make sure all connectors are free of dust/dirt/contamination
- Remove USB power cable from module when switching from ground power to engine/APU power
- Keep USB power cable free of seat track to avoid damage
- Store charger in moisture free and dust free environment

Cautionary Notes

- **Always** unplug USB cable(s) when switching between ground and aircraft/APU power
- **Never** plug charger into any AC power receptacle
- **Never** use charger if previously submerged in any liquid
- **Never** force charger into 12-36VDC power receptacle if electrodes (prongs) are bent or damaged
- **Never** remove USB power cable from charger by pulling on the cable (pull from base)
- **Never** use when the ambient temperature is below -40°C or above +55°C
